

JOHN F. KENNEDY HIGH SCHOOL

ATHLETIC DEPARTMENT

The mission of the John F. Kennedy Athletic Department is to promote athletics as an extension of the classroom to provide students with additional educational and life lessons. The John F. Kennedy Athletic Department is committed to developing well rounded student athletes academically, athletically and socially. The athletic program is dedicated to integrity, sportsmanship, student wellness, and the fulfillment of each individual's full potential.

Athletes must comply with both the standards of the school and the athletic department to remain eligible for athletic participation. At all times, coaches have the prerogative to enforce more stringent rules, provided that those rules are communicated in writing to the administrator in charge of athletics, Athletic Director, the athletes and their parents, prior to the beginning of that sport.

In addition to the tryout dates listed below, each of our programs also offer off-season conditioning programs for student athletes to partake in if they are not playing another sport at that time. Prior to trying out for any sport, students must complete the athletic participation paperwork that can be found online at <http://www.jfk.scusd.edu/athletics> or in the front office of the school. For more information, please contact our coaches or Athletic Director.
