# 2019-2020 COURSE SYLLABUS

### Integrated Mathematics III (Two semesters; 5 units each semester; 10 units total)

Integrated Mathematics III is a course stemming from the new Common Core course, Integrated Mathematics III, which expands on the topics of Integrated Mathematics I and II providing further mathematics development stressing the concept and application of a function. This college preparation course is the foundation for high school advanced and basic college level mathematics courses. It is the bridge from the concrete to the abstract study of mathematics. Starting with statistical inferences and conclusions, students will gain analytical and problem-solving skills. Then students will explore more advanced algebraic expressions and concepts. Topics include simplifying expressions, evaluating and solving equations and inequalities, and graphing linear and quadratic functions and relations. Real world applications are presented within the course content and a function's approach is emphasized. Math III topics include (but are not limited to): (1) statistical inferences and conclusions; (2) relations, functions, equations and inequalities; (3) conic sections; (4) polynomials; (5) trigonometry; (6) mathematical modeling; (7) algebraic fractions; (8) logarithmic and exponential functions: (9) sequences and series; and (10) counting principles and

logarithmic and exponential functions; (9) sequences and series; and (10) counting principles and probability.

### Vicki Feliz-Smith (Room B-14)

Vicki-feliz-smith@scusd.edu (916)395-5090x506114

Textbook: Common Core State Standards, Mathematics III, Integrated Pathway Walch

<u>Required Materials:</u> Pencils, colored pencils, highlighters, and a dedicated binder or tabbed section of a binder and loose leaf paper. No work will be accepted that is bound in or torn from a notebook. Students may use a calculator in class if they exchange it for their Student ID or bring their own. Rulers, compasses, protractors, and some other supplies are available for class.

Grading Policy Grades are based on demonstrated mastery of concepts and development of skills, not effort or potential. A major component of your grade is determined by your results on exams and quizzes. Progress reports are available on scusd.edu in Infinite Campus. Student overall performance is determined by exams (including final exam) and quizzes as well as assignments, which comprises homework (based on work collected), in class assignments (based on work collected such as worksheets, activities), and projects. Assignments are a guide as to what is most important and what will be tested. Assignments are given daily. Students not actively engaged in assignments and study will not be as successful. Planning your study should include a minimum hour of quality time daily. The math department complies with district protocol, viewable at scusd.edu. Make-up work/tests are the students' responsibility and may not be allowed without a valid re-admit, or excused absence.

### **GRADING SCALE**

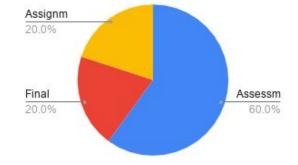

90% - 100%	A
80% - 89.9%	В
70% - 79.9%	C
60% - 69.9%	D
0 % - 59.9%	F

Category grades are weighted below:

60% Assessments (Tests, Quizzes, and some Projects)

20% Final Exam (One final for each Semester)

20% Assignments (Daily Practice, Warm-ups, and Exit Slips to assess your progress)

MAKE-UP POLICY FOR ABSENTEEISM: When a student is absent, it is his/her responsibility to find out what assignments, activities and notes were missed and make up that work promptly. Typically one day is allowed for each day absent). Since class activities can never be duplicated exactly, do not miss class if at all possible.

### **Course Objectives:**

Students will acquire and demonstrate knowledge of the concepts, definitions and properties required to meet the Integrated Mathematics III standards. Students will develop critical thinking and decision-making skills by connecting concepts to practical applications needed to be productive members of society. All students are expected to demonstrate the following objectives:

- Students should be able to work with functions represented in a variety of ways: graphical, numerical, analytical, or verbal.
- Students should understand the connections among these representations.
- Students should be able to communicate mathematics both orally and in well-written sentences and should be able to explain solutions to problems.
- Students should be able to model a written description of a physical situation with a function.
- Students should be able to use technology to help solve problems, experiment, interpret results, and verify conclusions.
- Students should be able to determine the reasonableness of solutions, including sign, size, relative accuracy, and units of measurement.
- Students should develop an appreciation of mathematics as an integrated coherent body of knowledge and as a human accomplishment.

### Academic Expectations:

- Attendance this course is very collaborative and participatory. So, being in class is essential.
- Work Ethic in addition to attendance, you will be required to work with a group and participate enthusiastically and constructively.
- Prepare for class- do all assigned reading or work for upcoming class discussions and activities.

**ACADEMIC DISHONESTY:** Academic dishonesty is considered a serious offense in any class. Students cheating will receive a zero grade for that assignment. I encourage collaboration on all practice assignments but I expect the work you submit (assignments, projects, exam/quiz, etc.) to be your own.

### Behavioral Expectations (See JFK Student Handbook for details.):

**CLASSROOM RULES:** The following few rules guide classroom behavior and activity.

- If you make a mess, clean it up, but avoid making messes.
- If you move something, put it back where it belongs.
- If you need classroom materials, get them yourself without disruption.
- Respect all people in the classroom, whether it is the teacher, a student, or someone else.
- A Class Pass will be available. One person may use it at a time for five minutes, and if you abuse the pass, you will be restricted in using it. Do not use it every day or take too long.

**ELECTRONIC DEVICES:** Personal electronics (music devices, cell phones, etc.) are to be turned completely off and away with exceptions for appropriate cell phone usage as discussed during class. Other technology will be available for class applications.

Extra Help: Bring your questions at lunch or let me know when you are coming after school.
