COURSE DESCRIPTION:

Students must pass 1st and 2nd semester of Mathematics 1 & 2, with a “D” or better, as a part of John F. Kennedy High School’s graduation requirements. In Mathematics 1, students will study the relationship between quantities, linear and exponential relationships, and reasoning with equations. In Mathematics 2, students will study extending the number system, quadratic functions and modeling, and expressions and equations.

COURSE OUTLINE:

As this course is for credit recovery, students will learn and practice the foundational skills of each course objective through independent study. Students will have access to scaffolded lessons, visual, auditory, and kinesthetic methods and activities, real life examples, small-groups settings, peer tutoring and collaboration, and one-to-one support, but it is up to the students to advocate for their needs and remain self-motivated. Students will be tested twice per semester packet to determine whether they were able to meet the following “Course Objectives.”

COURSE OBJECTIVES:

Math 1: Upon completion of this course, students will be able to:

1. Interpret parts of an expression (terms, factors, and coefficients).
2. Solve linear equations and inequalities in one variable.
3. Solve systems of two linear equations with two variables.
4. Graph the solution set to a system of linear inequalities in two variables as the intersection of the corresponding half-planes.

Math 2: Upon completion of this course, students will be able to:

1. Solve quadratic equations in one variable.
2. Solve a simple system consisting of a linear equation and a quadratic equation in two variables.
3. Interpret key features (x- and y-intercepts; intervals where the function is increasing and decreasing, relative minimums and maximums; and symmetries) of a quadratic function that models a relationship between two quantities.
4. Graph quadratic functions and show intercepts and minima/maxima.

TEXTBOOK:

Math 1: Common Core State Standards: Mathematics 2 Integrated Pathways

Math 2: Common Core State Standards: Mathematics 2 Integrated Pathways

REQUIRED MATERIALS:

Pencil – Students must come to class prepared with a pencil. Students are NOT to use pens, colored pencils, markers, etc. If a student does not come to class with a pencil, they may check one out for the class period. It must be returned before they leave for their next class.

Folder – Students will be provided with a folder that will be kept in the classroom. On the left side of the folder, students will store all GRADED work. On the right side of the folder, students will store all UNGRADED work.

Credit Recovery Packet – Students will be given a “Credit Recovery Packet” with one semester’s worth of work. Students will work on this packet independently until all work is completed. After completion, students will move on to the next semester’s worth of work.

*All other materials such as markers, paper, rulers, calculators, highlighters, colored pencils, etc. will be provided in class. These materials must be returned in the same condition that they were found in. Students who misuse, break, or vandalize these materials will lose their privilege of using them and must be responsible for providing their own materials.

ACADEMIC EXPECTATIONS:

All members of the classroom will be expected to:

1. Come to class on time and prepared to put forth their best effort.
2. Be respectful to ourselves, others, and the community.
3. Positively contribute to the learning environment.

Attendance: Attendance is VERY important. Students are expected to come to class every day. If a student is absent, a parent/guardian must excuse their absence(s) via email, phone, or note through the Attendance Office. The student will be responsible for making up the work that they missed before the end of the quarter. Students are also expected to come to class on time, meaning they are seating and starting their “Warm Up” when the bell rings. If a student is late, they will be expected to retrieve a Tardy Pass from a campus monitor before entering the classroom. Upon receipt of a Tardy Pass, the student will be marked “Present.” If students fail to retrieve a Tardy Pass, they will be marked “Late.”

Warm Ups/Classwork/Homework: Students are required to complete warm up at the beginning of each class. If a student is absent, they need to write, “ABSENT” on that day. Students will not be assigned homework. Students will be given time to complete all coursework during class time. Students will be responsible for keeping up with “Weekly Progress.”

Tests: Students will be given two tests per semester packet. Students will be allowed to use all notes, coursework, and a calculator during each test. If a student is absent on a quiz or test day, they are responsible for scheduling a time to make it up before school, during lunch, or after school.

GRADING POLICY:

Warm Ups	10%
Classwork	60%
Tests	30%
